

Engine/Tray Covers – M1022-A1 Dolly Set

The engine / tray covers for the M1022-A1 Dolly Set Mobilizer are designed to protect the Kubota diesel engine, hydraulic pump, hydraulic reservoir and battery from the elements during periods of long term storage or transport.

The covers are made from Herculite 80, a vinyl coated nylon material in accordance with MIL-C-43006, Type 1. The covers are form fitted and include hook and tape type fasteners to secure them to the dolly set front and rear tray assemblies in accordance with MIL-F-21840.

The covers can be left installed for highway or rough terrain transport and only need to be removed when the diesels engines are operated.

When not installed, the covers can be stored in the larger (optional) steel toolbox located on the front dolly.

The engine / tray covers also fit the commercial and export dolly set mobilizer configurations designated as CLT Dolly Sets.

The covers can be ordered from CDK Mobile Systems (CAGE 1NHH8) to the following part numbers:

- P/N 8D00378 – Cover, Front
- P/N 8D00379 – Cover, Rear
